

## Dimension Weight

Hello everyone! Let's talk about "how to calculate dimension weight" this month.

When we ship a package, we do not only weigh its weight but also need to calculate its dimension weight. When dimension weight is bigger than weight, the shipping fee will be collected according to the dimension weight.

## Dimensional Weight Calculation

$$\left[ \begin{array}{c} \text{Dimensional Weight} \\ \text{in Pounds} \end{array} \right] = \frac{L \times W \times H}{139}$$

L = Length in inches

W = Width in inches

H = Height in inches

From UPS.com

So when we pack our packages, try to minimize the unused, extra space in the boxes or put more items into the extra space to reduce our shipping fee!
