What is Zone?

Hello everyone! This month let's talk about "zone."

When checking UPS, FedEx and USPS price tables, you will see different zones. Shipping fee differs from zone to zone. So, what is zone?

Zones are defined according to the distance between the shipping address and the receiving address. Usually, a great zone number means longer distance and higher price.

You can check the zone of your shipping destination address through these links:

FedEx http://www.fedex.com/ratetools/RateToolsMain.do?method=SetupFindZones

UPS   https://www.ups.com/us/en/shipping/zones-and-rates/invalid-zip-code.page

USPS https://postcalc.usps.com/DomesticZoneChart

Happy shipping!
